PAIDI is future ...

Dear parents, dear children, a new, exciting chapter is about to begin - it is wonderful for us to be able to accompany your family during this time! We are very happy to show you all the possibilities to create the optimal environment for pupils: for (digital and analogue) learning and reading as well as for painting, crafting and being creative. Find out interesting facts about active, ergonomic sitting ... and how PAIDI student desks and chairs contribute to this. And discover our new, electrically height-adjustable e-lion 1 desk, which encourages your child to switch occasionally from a sitting to a standing position while they are working ... and thus promotes a healthy posture. We hope you enjoy browsing through this catalogue as much as we enjoyed putting it together. Yours sincerely, your PAIDI Team

Stay in touch
with us!

PAIDI fascinates.

PAIDI knows what parents want to know. From birth to their teenage years: Via our various channels, we offer topics that inform, entertain or simply make family life fun.

PAIDI'sWorld
www.paidis-world.de

PAIDI is Brand of the Century ...

*... and we would like to say thank you
for this very special award!*

PAIDI has been named „Brand of the Century“ by the publishing group „Die Zeit“ and Dr Florian Langenscheidt. The award honours the premier league of German brands - and illustrates the significance and importance of our brand PAIDI.

More information at www.paidi.de

PAIDI is sustainable.

As a manufacturer of furniture for children, we naturally feel a special obligation to use resources as carefully as possible. Our wood comes from environmentally friendly local forestry companies or European forestry's. Our furniture is manufactured so carefully that it can bear the Blue Angel and is classified into the best emission class „A“.

PAIDI uses non-toxic paints.

www.blauer-engel.de/uz38

PAIDI has been awarded with the Blue Angel.

PAIDI low in emissions.

PAIDI is climate neutral.

PAIDI makes an effort.

For more information, see the back cover.

*Sustainability is
is currently on
everyone's mind.
PAIDI's entire
production has been
climate-neutral
since 2016.*

This catalogue was printed on PEFC certified paper and the production has been climate neutral.

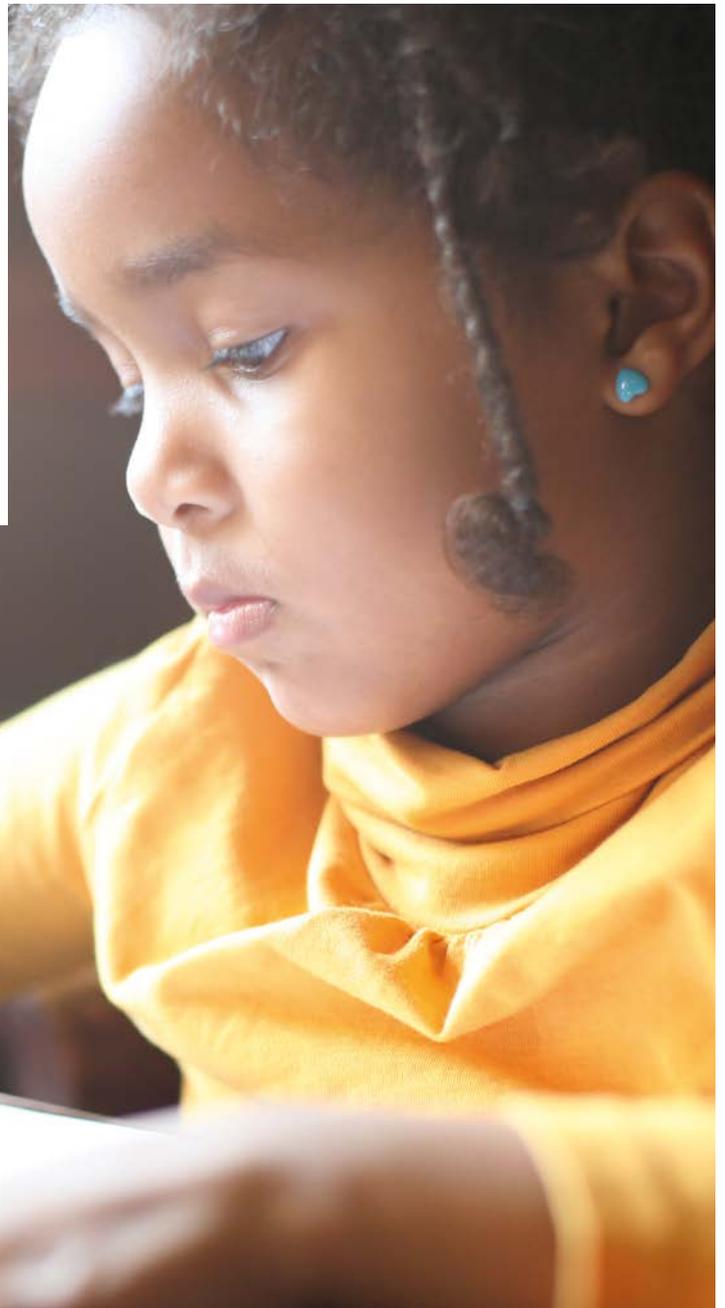

PAIDI is a good feeling.

Sareful selection of materials, high-quality workmanship, long-lasting stability - we can assure you of all this and much more with our 5-year product guarantee.

And because we also think about the big picture, we also give you a 5-year availability guarantee. Our student desks, chairs and stools will accompany your child safely and healthy throughout their school years - flexible, adaptable, stable and ergonomic.

Safe, harmless and tested, furniture with uncompromising quality - that is what PAIDI represents. Because nothing should be more important to us than providing the best possible environment for our children.

PAIDI guarantees quality.

PAIDI chairs with Sitness® technology.

PAIDI stands for tested safety.

PAIDI bears the RAL Quality Mark.

PAIDI thinks ahead.

PAIDI offers protection and quieter running.

PAIDI provides textiles trust.

For more information, see the back cover.

For the health and well-being of your child a correct posture while sitting down is important - because your kid is right in the middle of growing up.

Ergonomics during growth.

To prevent back problems and poor posture, ergonomic experts and orthopaedists recommend desks and chairs that can be adapted to the size and build of your child. PAIDI's students working stations can be set in many different ways – for a relaxing, fatigue-free work right from the start.

Sitness® - healthy sitting posture combined with a training effect. More information on pages 88 + 89.

Finding the right height.

Body size in cm	Table height in cm	Seat height in cm
< 142	53–58	30–34
143–157	59–64	35–38
158–172	65–70	39–42
> 172	71–79	> 46

Continuous height adjustments of our chairs and the optimal setting of the seat depth take care of the right posture right from the beginning.

All information about our chairs can be found on pages **auf den Seiten 76–95** and **110 + 111**.

It's all a matter of the right setting.

Removable for safety: The crank can be fitted on the left or on the right to adjust the desk to the optimal height – and after adjustment it can be removed easily. All PAIDI desks either come with a stepless fitting, a high-quality tilting mechanism or high-quality gas pressure springs and with that can be inclined up to 14°, 19° or 22°.

1. Feet on the floor!

For a determining of an optimal seating height, the soles of the foot should be flat on the floor, the thighs of your child form a horizontal line and the lower legs form a vertical line – so that an angle of 90° will be created.

2. How to get an upright posture?

An upright posture will relieve the spinal column. Important to achieve your goal: A correct adjustment of the seat depth which helps thighs and the back of your child to form a right angle.

3. Please take a seat at the table!

After having altered the chair, the height of the table top will be adjusted: The forearms should be placed into a right angle position onto the table top. With doing that an upright posture is achieved almost automatically.

Learning, crafting, playing: Everything is much more fun in a beautiful environment.

Marco 2.

A perfect fit in any case: whether in chalk white or maple imitation
- functionality, ergonomics, safety and quality are always a given.
So learning and working become a genuine pleasure.

Frame silver coloured

Decor chalk white

Decor maple imitation

Thinking about everything: Marco 2 looks good in every children's room and can be combined with many matching products, for example the Pepe school desk chair and the Speedy stool as shown here. Both are available with different covers. A practical addition to the desk for all kinds of documents: the mobile pedestal with three drawers, the top one is lockable. There's even more storage space for magazines, tablet and co. in the storage compartment on the back.

Marco 2.

*Children need a lot
of space to be able
to develop.*

*With the right setting,
everything will work out.
Left as well as right.*

Marco 2 GT.

Split tabletop, double the functionality - for both right-handed and left-handed users. And one thing is certain: the narrower part always provides a firm surface and base for drinks, notebooks or painting utensils, which of course should not tumble off the table when the tabletop is tilted. Available in two decors.

Frame silver-coloured.

Decor chalk white

Decor maple imitation

Marco 2 GT.

Ready for all possibilities: Whether in chalk white or maple - Marco 2 GT adapts perfectly, also to the different needs of right-handers and left-handers. Always a good choice: the universal container that can be mounted under the tabletop or the mobile container with seat cushion, matching the modern Sino 2 desk chair or Speedy stool, or the classic Pepe, rated „very good“ by Ökotest 10/2015.

Little Vikings also learn for life, always ready for the next adventure at school.

*The best environment
for new ideas.*

Marco 2 und Marco 2 GT.

Marco 2's fact sheet

Height: adjustable from approx. 53 to 79 cm
Inclination: up to 19°
Width: 120 cm
Depth: 70 cm

Marco 2 GT's fact sheet

Height: adjustable from approx. 53 to 79 cm
Inclination: up to 19°
 (fixed table top can be mounted left or right)
Width: 130 cm (90 cm main table top with inclination, 37,5 cm fixed table top)
Depth: 70 cm

Thanks to the flexible installation possibilities of the fixed table top, **Marco 2 GT is perfect for left- and right-handed children** and can be placed flexible in the children's room – without restrictions when it comes to ergonomics and security. Between both table tops **a little brush is mounted**, the brush prevents small things from falling on the ground and also prevents hands from being caught in-between (image in chalk white). The **crank** can be fitted on the left or on the right to adjust the desk to the optimal height – and after adjustment it can be removed easily. The **integrated ruler** provides objects from falling of the desk. **Nice feet** – The caps at the end of the foot are placed seamlessly within the frame.

Frame silver coloured

Decor chalk white

Decor oak-Nautik-imitation

Decor oak-Nebraska-imitation

Decor slate grey

*Even with a Tiny House
there is still enough space for
studying: Diego can be adapted to
every child's room and every taste.*

Diego.

For all ages: Diego always looks good. Whether in chalk white matching the Tiny House, in oak nautical or oak Nebraska at the trendy workstation, for example with the chairs Sino 2, Tio and Speedy stool. The wheeled caddy with lots of storage space, the pinboard for quick access and the wheeled container that doubles as a seat all serve as organisational aids.

For work, play and fun: of course Diego not only helps with studying for school but is also there for any kind of crafts. And because pupils always have to store lots of things, the mobile container comes with a roomy compartment at the back. Optional: the comfortable seat cushion in PAIDI upholstery colours, matching the desk chairs such as Sino 2 and Speedy stool.

Diego.

*There must always be
space for fun.*

*Always stay versatile -
with this desk, nothing
could be easier.*

Diego GT.

Divided and variable - more options in terms of creativity and functionality. The fixed part can be mounted on the left or right, as required, and the inclinable main board can be tilted up to 19° - for better ergonomics while writing and painting.

*Best perspectives
with a modern
workplace.*

Diego GT

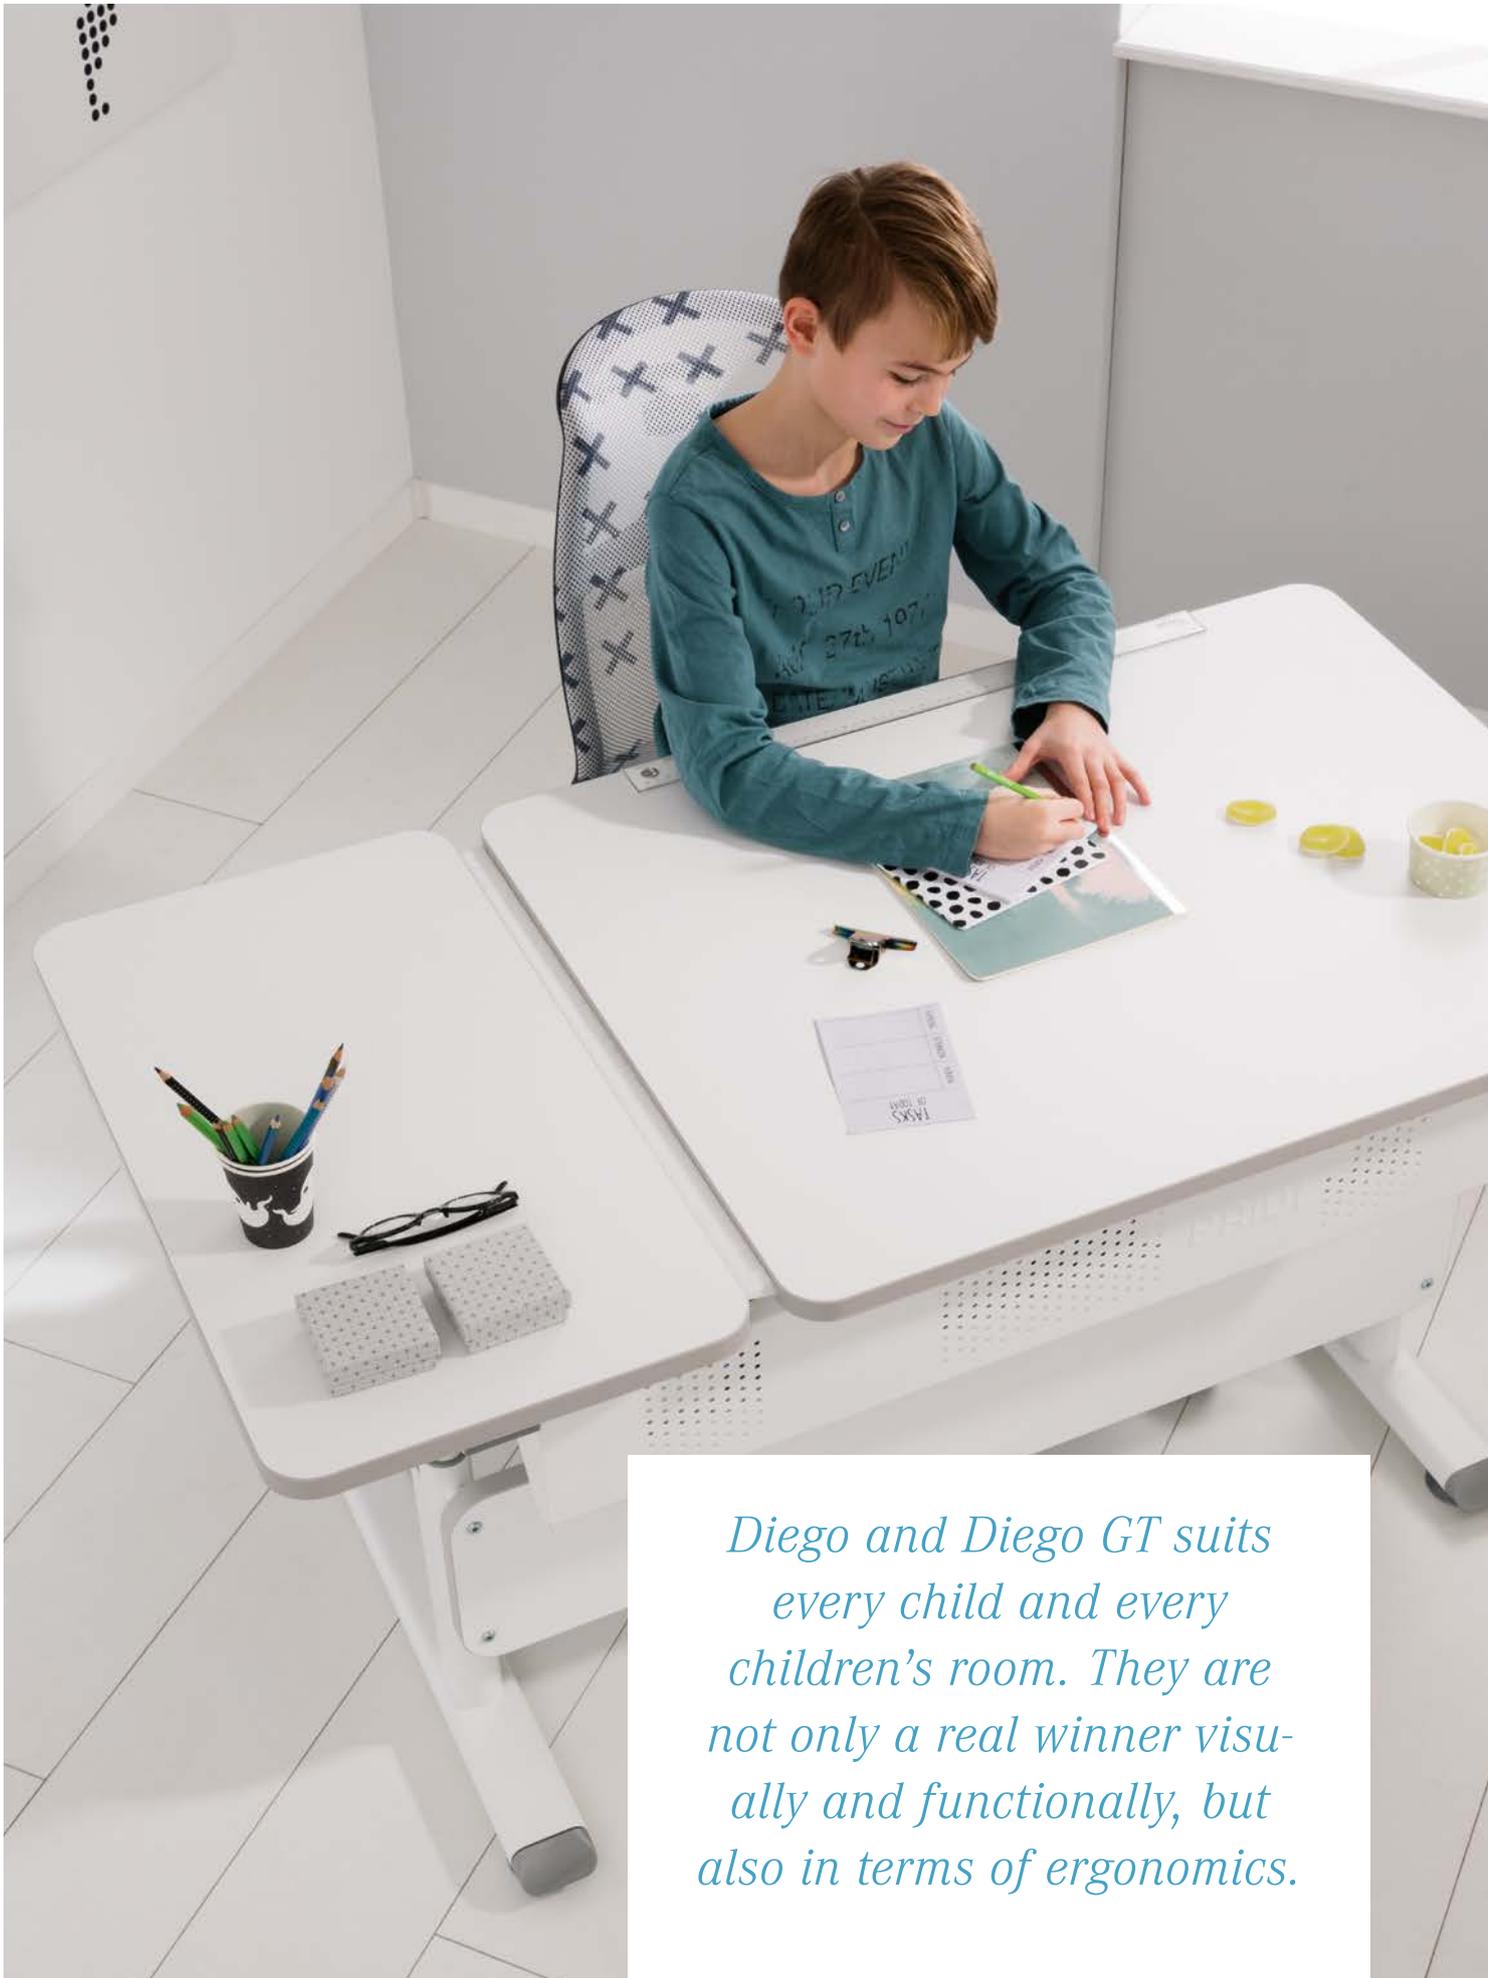

Flexible use: The universal container can be fitted on the left or right under the divided tabletop. The bottom drawer can be locked for personal belongings. And for students who want to exercise their back muscles while learning the Speedy stool is a good choice. Like the Sino 2 desk chair, it is available in various popular colours.

*More individual
freedom. For left-
and right-handers.*

Diego and Diego GT suits every child and every children's room. They are not only a real winner visually and functionally, but also in terms of ergonomics.

Totally trendy, totally functional.

Diego's fact sheet

Height: adjustable from approx. 53 to 79 cm

Incline: up to 19°

Width: choose between 105/120/140 cm

Depth: 70 cm

Diego GT's fact sheet

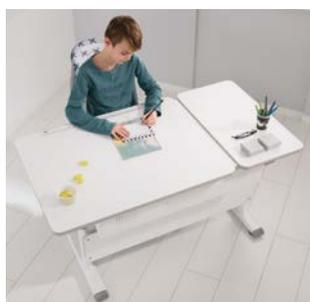

Height: adjustable from approx. 53–79 cm

Inclination: up to 19°

(fixed table top can be mounted left or right)

Width: 130 cm (90 cm tiltable main table top, 37,5 cm fixed table top)

Depth: 70 cm

Thanks to the flexible assembly of the fixed tabletop, **Diego GT is ideally suited for both left- and right-handed users.** The integrated little brush in white, located between both table tops prevents jamming of fingers and falling down of any utensils, erasers and pens. The removable **crank** for height adjustment can be mounted left or right. **Rounded corners underline the elegant design of the table top.** The satchel-hook can be mounted left or right and helps keeping order. **Ruler and storage space are standard.**

Diego/Diego GT.

Three steps to finding your desk.

1 Select table width.

2 Select the decor of the tabletop.

*More colour, more joy
with the multimedia
design desk.*

Tablo.

Tablo - the stylish desk: the elegant storage trays with coloured inserts in blackberry, lime, azure blue or white/grey are real eye-catchers - and match the cool drinking bottle and mug from koziol that come with the desk. Also a clever feature: the smooth-running castors on the back, which make it easy to move around, the integrated cable channel and the practical docking station.

Frame silver-coloured

Decor chalk white

Jury decision

The modern desk provides the maximum when it comes to comfort, for example the adjustable height and many more functions which take care that all pupils can concentrate perfectly on their homework.

*Style is a must have
- for girls as well as
for boys!*

Everything matches: the colour of the seat upholstery can be chosen to match the storage trays - as shown here in the Tio desk chair and the Speedy stool in azure blue and blackberry. Even the seat cushion for the mobile container is available in matching colours. The stylish functional board with three hanging trays ensures even better organisation on the desk.

Tablo.

*Colour or clean?
In any case
Tablo!*

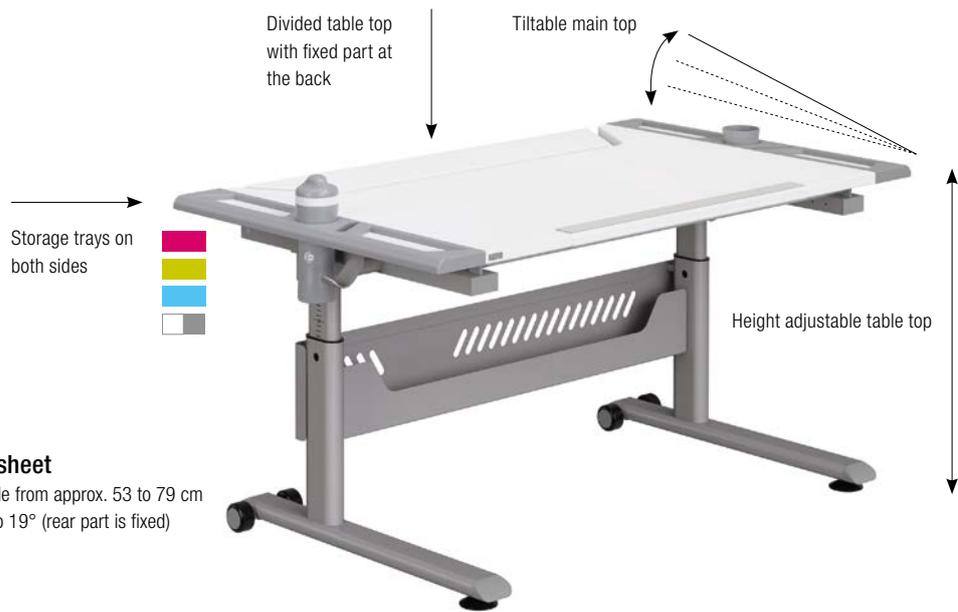

Timelessly beautiful: With its grey storage trays and matching Tio student's desk chair, Tablo appears more „grown-up“. The 3S mobile pedestal with its silver-coloured front also reflects this. Its handle makes it easy to manoeuvre. The top drawer has an integrated utensil tray, the bottom drawer is lockable. With a seat cushion, the container becomes a mobile chair.

Tablo.

Colourful and smart.

Tablo's fact sheet

Height: adjustable from approx. 53 to 79 cm
Inclination: up to 19° (rear part is fixed)
Width: 120 cm
Depth: 70 cm

Easy to see from above: The split table top with the fixed part at the rear and the storage trays at the sides of the inclinable main table top. **Tablo sets accents in five colours: 4 inserts for the storage trays, 1 drinking bottle and drinking cup in your favourite colour come with every desk.** During studying or playing kids often forget to drink, that's why Tablo comes with matching drinking bottle and cup from koziol. Tablo is multi-media – no cable clutter thanks to our cable channel: It offers space for a practical multiple socket. Both integrated holders can also be used as a charging station for a mobile phone. MP3-player and other things. **Cleared: Cable from the Monitor etc. disappear in the cable channel. Mobile: Thanks to the castors Tablo is easily movable.**

Tablo.

* Please add a colour code as the final digit:

*Optics and technology
complement each other
perfectly.*

Jaro.

Jaro not only looks good, it can also do a number of things.

The beautifully shaped tabletop is divided into a tiltable and a fixed, L-shaped part with a pencil cup and a three-part utensil tray, which is also a handy charging station thanks to the cable passage. Whether for left- or right-handers - Jaro is available in two versions. The highlight: two high-quality gas pressure springs and a light lever pressure bring the tabletop almost floating into the right position.

Frame white

Decor chalk white

Decor slate grey

Stylish and compact: Mobile pedestal in chalk white or slate grey. A utensil tray is integrated in the top drawer. The shelf at the back can also be used to store magazines, for example. Optionally, the seat cushion for the pedestal can be chosen in a colour that matches the cover of the desk chair, as can be seen here with Yvo. A functional board with three hanging trays can be mounted on the Jaro desk as a small organiser.

Jaro.

Jaro meets all individual requirements.

Ergonomics first - with all the comfort!

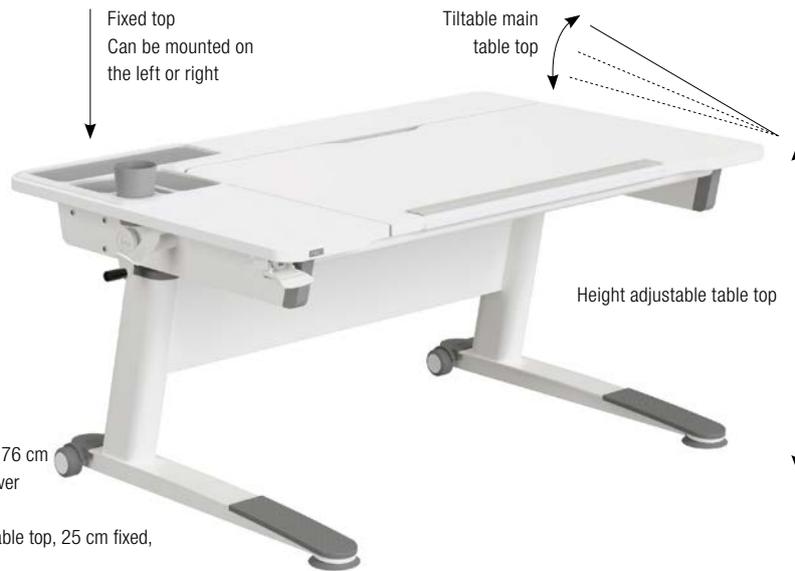

Jaro.

Ergonomics while sitting. The infinitely height-adjustable desk and chair - such as Yvo and Ypso here - enable a correct posture at the angled worktop at all times. Thanks to the mobile caddy, all important documents and materials are always within reach. More information on the mobile storage space on page 114.

Thought out and variable.

Jaro's fact sheet

Height: adjustable from approx. 54 to 76 cm

Inclination: up to 22° by pushing a lever (fixed L-shaped table top, left or right)

Width: 120 cm (95 cm tilttable main table top, 25 cm fixed, L-shaped table top)

Depth: 75 cm

Right- or left-hander? No problem! Jaro is available in two variants and perfectly fits children's needs. **Innovative technology:** Two high-quality gas pressure springs support the inclination and bring the table top into the right position - up to an angle of approx. 22°. Up and down: The table top can be adjusted steplessly at the push of a lever. For preventing a catch of fingers it is necessary to push the lever and push the table top down at the same time. **More functions:** By means of the both castors at the rear side the desk can easily be moved. The silver-grey protection coverings protect the white frame from dirty and dust and are at the same time a nice design feature. **Clearly arranged:** The fixed part provides order for all pens, phones and Co. Very practical: Thanks to the cable passage and the matching silver-grey anti-slip mats the bigger tray can also be used as a charging station.

Jaro.

Desk

Fixed L-shaped top left, recommended for left-handers, white frame with silver-grey protectors.

Material	Dimensions W 120 / D 75 cm
Chalk white	140 723 1
Slate grey	140 723 9

Fixed L-shaped top right, recommended for right-handers, white frame with silver-grey protectors.

Material	Dimensions W 120 / D 75 cm
Chalk white	140 724 1
Slate grey	140 724 9

Cable canal

Material	Dimensions W 85.8 / H 18.8 / D 9.5 cm

Plastics, silver-coloured	146 814 0

More seat cushions for the mobile pedestal can be found on page 43.

Even more great ideas can be found on pages 112-114 and for the optimal lighting see our desk lamp PARA.MI – see page 115.

*Clear edges: the desk
with that certain
something.*

Teenio. NEW

Design with function. The Teenio tabletop inspires with its clear and straight design language. The frieze on the front edge offers that certain something, which at the same time prevents books from slipping off while also providing a design accent available in four different colours. The highlight: the frieze can be changed (later on).

Frame white

Friese light blue

Friese rosé

Friese solid oak

Friese pebble grey

Teenio.

Unlimited storage space: a child's room needs lots of organisational aids. The Teenio chalk-white desk comes with a matching roll container that can be used to store utensils of all sizes. For quick access, the pinboard can be attached directly above the desk. In addition, there are sideboards and shelves throughout our PAIDI programmes that offer even more storage space.

*Well organised
throughout the room.*

Matching colours: The frieze on the edge of the Teenio desk not only prevents notebooks from slipping down, but also adds a beautiful colour accent. Here in rosé, which can be extended to the cover of the Ypsos desk chair and the seat cushion on the mobile container. But depending on taste, it also comes in a more neutral pebble grey or solid oak.

Teenio.

*As colourful as life
itself, whether it is with
colourful accents or a
natural look.*

Together, time at the desk is even more fun.

Teenio GT. NEW

Split tabletop, double the benefits. The Teenio GT is equipped with a divisible table top. The fixed part can be positioned on the right or left side. For an even more ergonomic workplace, the inclinable main tabletop can be tilted to an angle of up to 14°. The frieze in four colours with a pen holder is a visual highlight - and can be replaced (later on).

Frame white

Friese light blue

Friese rosé

Friese solid oak

Friese pebble grey

Teenio GT.

Making learning more fun: the colour of the tabletop frieze, here in rosé - optionally also in light blue, pebble grey or solid oak - can be extended to the Ypsó desk chair and the loft and play bed. The large drawer of Teenio GT is equipped with a self-closing mechanism and a soft-close system with plenty of storage space for all kinds of work materials.

A school desk and a child's paradise can be found close to each other.

Matching accents. The frieze - here in solid oak - on the edge of the Teenio GT table features a tray for pens. In addition, the slight elevation prevents any possibility of something slipping off. With its pebble grey or light blue finish, the colour accent complements the Ypso desk chair and also the Tiny House.

Teenio GT.

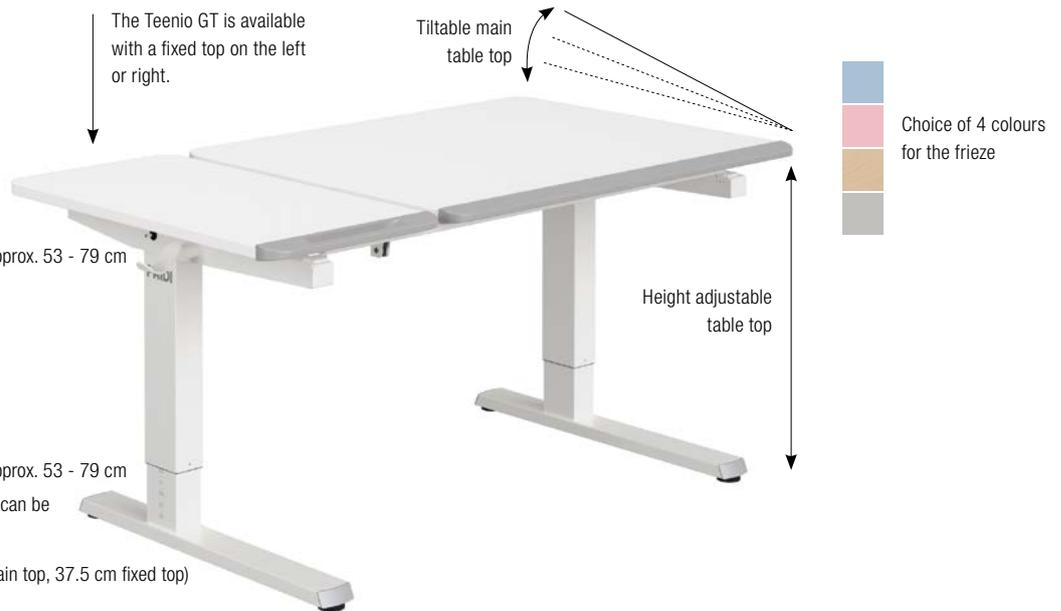

*Alone or in an ensemble:
Teenio GT is a beautifully
shaped eye-catcher.*

*Full length or divided:
This desk inspires
with both its shape
and its function.*

Teenio und Teenio GT.

Teenio's fact sheet

Height: grows with the child from approx. 53 - 79 cm
Inclination: up to 14°
Width: 120 cm
Depth: 75 cm

Teenio GT's fact sheet

Height: grows with the child from approx. 53 - 79 cm
Inclination: up to 14° (the fixed top can be placed on the left or right)
Width: 130 cm (90 cm inclinable main top, 37.5 cm fixed top)
Depth: 75 cm

The divisible tabletop of **Teenio GT** is **choosable for left- and right-handed children**. The **integrated strip brush** between the two tabletops prevents fingers from getting caught and small items from slipping through. The **replaceable frieze** not only features a tray for pencils, but also prevents notebooks & co. from slipping down. **Silent and stepless tilting** of the main tabletop up to 14°. **Rounded corners and the tapered shape of the frieze** emphasise the attractive design of the tabletop. The **crank** for height adjustment can be mounted on the left or right and can be removed after being used. The **bag hook**, which can be mounted on both sides, helps keep things tidy. **High-quality frame and feet** - the finishing caps are seamlessly integrated into the design of the frame. The frame has a modern look and is very stable.

Pepe.

Fact sheet

Seat height (without adapter):
approx. 33–44 cm

Seat height (with adapter):
approx. 38–49 cm

Seat width: approx. 44 cm

Seat depth: approx. 32–37 cm

Back height: approx. 50–57 cm

Back width: approx. 43 cm

Load-bearing capacity:
max. approx. 80 kg

Frame: silver-grey

The **rear view** shows that Pepe's backrest is ergonomically adapted to the shape of the pelvis.

Practical hook. With its hook on the back, chair Pepe is easy to manoeuvre.

Adapter (red). To enable Pepe to grow from primary school to A-levels, it is supplied with a seating height adapter.

Foot glides option *. For children with lots of energy, there is a set with five matching foot glides (246 805 0). Seat height: 36 cm to 47 cm.

* Can only be used in combination with inserted adapter

Equipment

- Continuous seat height adjustment by a special gas pressure spring perfectly coordinated to children
- Seat depth adjustable and by using an allen key under the seat it can be absolutely fixed.
- Adjustment of the back by push-button-system
↳ for an optimal relation of seat height, depth and seat back, following DIN EN 1335.

- Load dependent braked safety double castors for the use on hard and soft floors*
- Breathable foam pad

* For the use on sensitive floors (e.g. parquet, cork, laminate) we recommend the use of an additional floor protecting mat. In case of non-compliance, we assume no liability for damage done.

YVO.

Fact sheet

Seat height: approx. 36–48 cm

Seat width: approx. 42 cm

Seat depth: approx. 31–42 cm

Back height: approx. 46 cm

Back width: approx. 41 cm

Load-bearing up to: max. approx. 80 kg

Cover: air-permeable 3D cover
100 % polyester

Frame: White

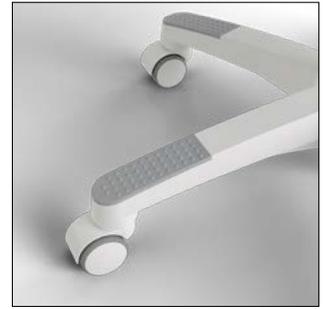

With its silver-coloured **back**, Yvo also looks good from behind.

The **breathable foam cushion** is particularly comfortable to sit on.

Handy handwheel By turning both handwheels at the same time the height of the back and also the seat depth can be adjusted.

The silver-grey **protectors** are saving Yvo's white frame against scratches and dirt due to shoes scuffing.

Features

- Continuous seat height adjustment by a special gas pressure spring geared to childre
 - Seat depth and back stepless adjustable by turning both handwheels at the same time.
 - ↳ for an optimal relation of seat height, depth and seat back, following DIN EN 1335.
 - Load dependent braked universal castors for the use on soft and hard floors*
 - Breathable foam pad
 - Covers are removable and washable at 30 °C
 - Load-bearing cover: 50.000 cycles/martindale
 - Light-fastness: 6 (corresponds very good)
- * For the use on sensitive floors (e.g. parquet, cork, laminate) we recommend the use of an additional floor protecting mat. In case of non-compliance, we assume no liability for damage done.

Yvo.

Ergonomics with style: This chair is not only good-looking but also good for your child's back – at best in combination with our desk Jaro.

Handy handwheel

By turning both handwheels at the same time the height of the back and also the seat depth can be adjusted.

Stylish and functional: Thanks to its white-grey hard floor castors and its elegant handle at the rear Yvo can easily be moved – and is also very flexible. Continuous height adjustment of seat and back by a toplift function and by means of little handwheels at the back. The depth can be adapted ergonomically as well.

Changing covers

Taking care of replacement: For Yvo individual covers for the seat and back can be ordered.

Ypso.

With the push button system on the armrest it is easy to adjust the depth of the backrest and the height of the armrests.

Intelligent height adjustability from the first grade all the way to graduation.

With a quick release you can adjust two segments of the seat height:
 A = low from 30 - 38 cm,
 B = high from 38 - 46 cm.

Height range B

Height range A

See how the adjustment of the quick release works.

*Better sitting
in motion.*

See how Sitness® works.

The advantages of Sitness®

A healthy, natural range of motion makes sitting noticeably easier for children and is good for the spine and circulation

- trains pelvic and back muscles
- Extends the ability to concentrate
- Increases motivation

Sitness®

Desk chair Tio Sitness®

Active stool Speedy

Standing/Sitting Stool Swifty

Active and dynamic sitting prevents posture damage, improves blood circulation and trains the muscles. And those who already have a well-trained back feel more comfortable and have more energy for learning and creativity.

The term Sitness® describes the following principle: promoting fitness while sitting. Because regardless of whether you are a primary school kid or a teenager - Fitness is required everywhere and is constantly required by body and mind.

That is why the Tio Sitness® desk chair for schoolchildren has a stable joint underneath the seat, while Speedy our active stool has a specially curved foot. Both methods serve the same purpose: they make moveable sitting possible. The Sitness® technology creates a semi-rigid connection between floor and body through the seating furniture - stable enough to sit securely and flexible enough to ensure that sitting does not become a burden in the long run. Not only the particularly hard-working kids will be happy to sit down and study with this clever furniture.

Tio and Tio Sitness®.

Tio and Tio Sitness®

Lift the armrest, adjust the back, bring the armrest back in position: That's how the back is easily adjusted in height and depth – and the seat depth is also easily to adjust. Tio & Tio Sitness® supports your child through many years – thanks to the stepless height adjustment through the special toplift-function.

Tio and Tio Sitness® score not only with their modern design, but also with excellent economy features and lots of practical details!

For an active, three-dimensional sitting experience: The Sitness® joint supports the child to tilt the seat of the chair in all directions - simply by shifting their body weight. This 360° movement encourages the child to stay in motion while sitting down. This not only trains the back muscles and promotes a healthy posture, but can also increase the ability to concentrate.

Changing covers

Spare covers are provided: For Tio & Tio Sitness® individual covers for the seat and back can be reordered.

Colours	Seat	Back

The covers are easily removable and can be machine washed at 30 °C.

Speedy.

Speedy is the movable seat alternative to the student desk chair, with the patented Sitniss® technology it brings dynamic seating alongside secure stability to the student desk. After all, what applies to adults has to be considered even more for the developing spine of children: Long, inflexible sitting is unhealthy because the back in particular is exposed to strain. The effect of Speedy: movement and sitting are not two sides of the same coin - on the contrary - with Speedy activity is encouraged. Muscles and the brain are better supplied with blood, thus well-being and ability to concentrate increase noticeably.

Fact sheet

- Seat height:** approx. 38 -48 cm
- Seat width:** approx. 38 cm
- Seat depth:** approx. 27 cm
- Load capacity up to:** max. approx. 80 kg
- Cover:** 100 % polyester

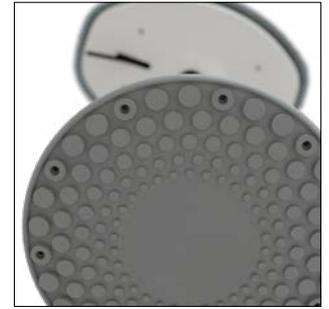

Beautifully oval shaped and ergonomically adapted seat surface

The breathable foam cushion is particularly comfortable to sit on.

The Speedy follows the Sitness® principle: the dynamically shaped foot eliminates the rigid connection between stool and floor and creates an active, three-dimensional sitting experience thanks to the horizontal 360° swinging effect. Speedy offers a higher degree of freedom when it comes to movement and automatically trains the back muscles. In this way, the stool can counteract postural deformities at an early stage and in a preventative manner.

Features

- Seat height continuously adjustable thanks to gas pressure springs specially designed for children
- Oval, beautifully formed seat
- Horizontal swing effect
- Feet made of high-quality thermoplastic material for soft and hard floors*

- Load capacity cover fabric: 50.000 scratches/martindale
- Light fastness: 6 (equals very good)

* For delicate hard floors (e.g. parquet, cork, laminate) we recommend the additional use of a floor protection mat. In the event of non-observance, we cannot accept any liability for any damage that may have occurred.

*A New Approach
to studying at
Home.*

e-lion 1.

Elegant look, ergonomic working. To match the chalk-white frame four different desk top decors are available. With its slim 16 mm and rounded short sides, it underlines the filigree look of the e-lion 1. To complement the electric height adjustment, the Swifty standing/seating stool is available. Its seat height of approx. 52 to 76 cm also allows the user to lean against it and thus relieves the strain on the back.

*Adapts - in
height and
in style.*

e-lion 1.

Modern and versatile workplace. The electrically height-adjustable desk adapts to the surroundings and sets its own accents, as shown here in slate grey and nautical oak. The mobile pedestal with three drawers is available in the same style. The roll caddy and the pinboard are also clever organisation aids with a great look.

Keeping a good posture, whether sitting or standing.

e-lion 1.

e-lion 1's fact sheet

2 widths: 130 and 150 cm

Depth: 75 cm

Height: electrically adjustable
from approx. 62 - 127 cm

Memory function: 4 positions can be
programmed for your individual desk height.

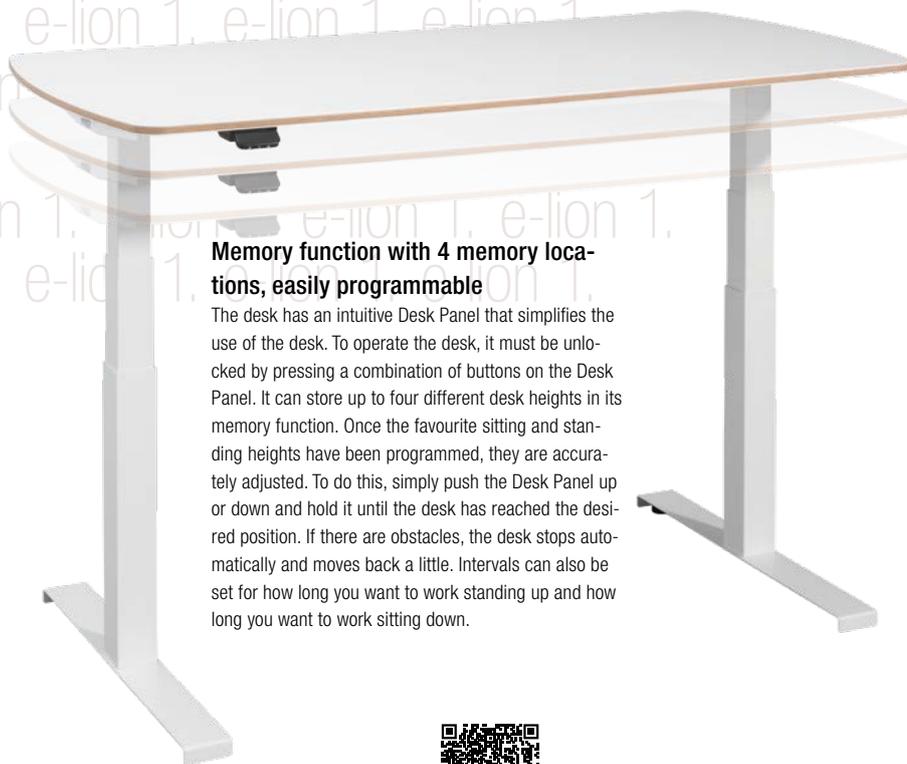

Reminder to get up: a light strip on the Desk
Panel can give the signal to get up at intervals.

Digital child lock: the Desk Panel is unlocked
by a key combination. This means that
younger siblings cannot adjust the height.

Chalk white powder-coated pedestal. The table height of e-lion 1 can be adjusted **electrically** with a smooth start and stop. A **memory function** can be used to programme 4 favourite positions. If desired, the Desk Panel reminds you to get up at regular intervals. The **childproof desk** brakes when it encounters obstacles and resets easily. The Desk Panel can be easily mounted on the right or left under the filigree, 16-millimetre-thick tabletop. Orderly and secure **cable routing** under the desk panel. **Very easy to assemble** in just a few steps.

e-lion 1.

Memory function with 4 memory locations, easily programmable

The desk has an intuitive Desk Panel that simplifies the use of the desk. To operate the desk, it must be unlocked by pressing a combination of buttons on the Desk Panel. It can store up to four different desk heights in its memory function. Once the favourite sitting and standing heights have been programmed, they are accurately adjusted. To do this, simply push the Desk Panel up or down and hold it until the desk has reached the desired position. If there are obstacles, the desk stops automatically and moves back a little. Intervals can also be set for how long you want to work standing up and how long you want to work sitting down.

See how the Desk Panel works.

Table frame variable with a worktop width of 150 cm, so that e.g. a mobile pedestal fits underneath and next to the desk.

See how easy it is to assemble the e-lion 1:

e-lion 1 desk

Swifty. NEW

Swifty is the mobile seating alternative to the school desk chair and brings dynamic sitting with secure standing to the school desk with the patented Sitness® technology. Because Swifty can be adjusted to a height of up to 76 cm, children can not only sit on it, but also lean against it in a high position, i.e. sit upright, so to speak. This makes it possible to work ergonomically while standing up and also relieves the strain on the back.

The effect of Swifty: movement and sitting are not mutually exclusive, but on the contrary - activity is promoted. Muscles and brain are better supplied with blood, so well-being and the ability to concentrate increase noticeably.

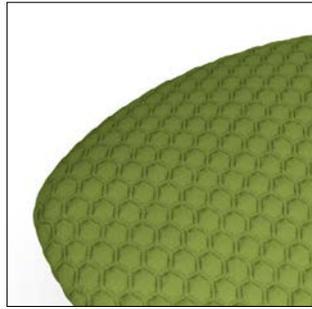

Fact sheet

- Seat height:** approx. 52 - 76 cm
- Seat width:** approx. 38 cm
- Seat depth:** approx. 27 cm
- Load capacity up to:** max. approx. 80 kg
- Cover:** 100 % recycled polyester
- Frame:** white

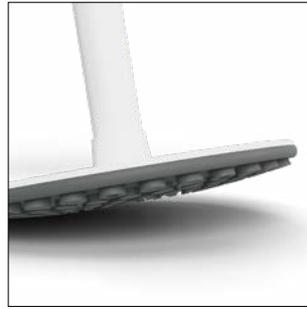

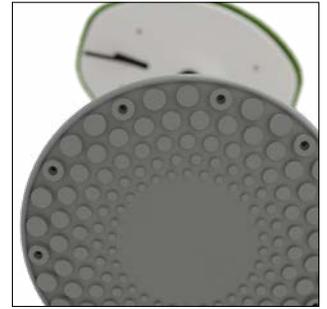

The oval seat is particularly beautifully shaped and comfortable.

Cover with honeycomb structure, 100% recycled polyester made from plastic bottles.

The Swifty follows the Sitness® philosophy: the dynamically shaped foot removes the rigid connection between the stool and the floor and creates an active, three-dimensional sitting experience with the horizontal 360° swing effect. Swifty thus offers more freedom of movement and automatically trains the back muscles. As a result, the standing/sitting stool can counteract posture problems early on.

Equipment

- Seat height continuously adjustable up to approx. 76 cm thanks to gas pressure spring
- Oval, beautifully shaped seat
- Allows movement and frequent change of working position even when leaning
- Horizontal swing effect
- Base made of high-quality, thermoplastic polyurethane for soft and hard floors*.
- Cover fabric load capacity: 50,000 abrasion

cycles/martindale

- Light fastness: 6 (corresponds to very good)

* For sensitive hard floors (e.g. parquet, cork, laminate) we recommend the additional use of a floor protection mat. In the event of non-observance, we cannot accept any liability.

PARA.MIs fact sheet

Luminous efficacy: 75 lm/W

Illuminated area: approx. 60 x 60 cm
white 146 817 1

This product contains a light source with an energy efficiency class rating of D.

PARA.MI

Looks good and provides good vision: Thanks to its futuristic design our lamp PARA.MI is timeless – and the light is pleasant and even. The head of the lamp is rotatable, and the joints are stepless adjustable – everything a matter of the right setting.

Integrated: The on- and off-switch comes with a continuous dimming function, which is activated by pressing the switch longer or shorter. The highlight: PARA.MI remembers thanks to its memory function the last brightness setting and when turned on again sets back to the setting automatically. Thanks to an adjustable automatic PARA.MI turns off after a specific time.

Homogeneous: 102 LED lamps and a special reflector provides a homogeneous, glare-free lighting – and it is also an outstanding energy-saving measure.

Stylish: PARA.MI is not just a lamp, rather a design object which brings light and style into the children's room.

PAIDI ist das gute Gefühl.

Durability and sustainability.

PAIDI guarantees quality

We stand for the flawless workmanship of our products with the extended 5 years PAIDI guarantee.*

* except textiles and mattresses

PAIDI thinks about the future

For all current PAIDI catalogue programmes, we offer a 5-year availability guarantee.*

* except textiles and mattresses

Quality and safety.

PAIDI represents tested safety

Our PAIDI furniture, which is tested according to the standards for children's furniture, bears the GS mark. This is considered to be the most reliable guarantee for the functional security and overall safety (of furniture and articles of daily use) and is awarded by independent test centres approved by the Federal Ministry.

PAIDI carries the RAL quality mark

The "golden M" is awarded by the German Association of Quality Furniture (DGM) a character that is received only by furniture that is tested through their paces. They must be processed stable, secure, durable and well processed - and also meet the highest standards from a health perspective. More information at www.dgm-moebel.de/de/hersteller/paidi-moebel-gmbh

PAIDI is Brand of the Century.

Awarded by the ZEIT publishing group and Dr Florian Langenscheidt

The award, which is granted in accordance with strict criteria, illustrates the significance and importance of the brand: PAIDI IS children's furniture.

Ergonomics and motion.

PAIDI chairs with Sitness® technology

PAIDI desk chairs and stools, which follow the Sitness® concept, create a dynamic and ergonomic sitting experience through 360° movement of the seat.

People and the environment.

PAIDI uses non-toxic lacquers

DIN 53160 and EN 71-3 are among the strictest standards. They are normally applied to children's toys that are particularly frequently put in the hand or mouth.

PAIDI bears the Blue Angel

PAIDI furniture are so low emission that they are allowed to carry the Blue Angel.

www.blauer-engel.de/uz38

PAIDI is low in emissions

PAIDI furniture is particularly low in emissions. Therefore, they have been classified in the best emission class "A" by the German Furniture Quality Association.*

* The collections/models marked with the emission label comply with the award basis for the emission label of the Deutsche Gütegemeinschaft Möbel e.V. in the respective category.

PAIDI is climate neutral

PAIDI has been the first climate-neutral children's furniture manufacturer since 2016. The company has reduced all emissions and made them climate-neutral, such as direct emissions that occur during combustion in the heating system, or indirect emissions that occur in the procurement of electricity. PAIDI also supports projects for reforestation and the expansion of regenerative energies, thus achieving the highest level of the Climate Pact of the German Furniture Quality Association (DGM). More information at www.dgm-moebel.de/de/hersteller/paidi-moebel-gmbh

PAIDI is committed

As a member of the Alliance for Development and Climate, PAIDI supports CO2 compensation projects in developing countries.
